

# AGUSTIN DONALISIO

## SOFTWARE DEVELOPER

### ABOUT ME

I'm a systems student at ORT with prior experience in software development. Before embarking on the journey to become a Full Stack developer, I worked at Obux. I undertook an intensive course at Plataforma 5, which spanned over 800 hours, to acquire proficiency in key technologies, including MongoDB, Express.js, React.js, and Node.js. During the program, I also gained exposure to agile methodologies like Scrum and participated in pair programming sessions.

My combined experience at Obux, along with the training I received during the course, has furnished me with a robust foundation in Full Stack development. Presently, I am enthusiastically pursuing opportunities within the IT sector, with a particular focus on companies that place a premium on collaborative teamwork and foster continuous professional growth

### WORK EXPERIENCE

#### Front & Back End Developer

Obux, February 2021 - Mayo 2023

- **Application Development:** Application Development: Designing and building web and mobile applications, encompassing the creation of comprehensive solutions for software development projects.
- **Client Interaction:** Active and effective communication with clients to understand their requirements, gather feedback, and ensure their needs are integrated into product development.
- **Team Collaboration:** Close collaboration with other team members, participation in planning meetings, code reviews, and support in development activities.
- **Maintenance and Optimization:** Continuous maintenance of existing applications and problem-solving.
